# ELEVATE

Future Faster

The future is fast, be ready with the exceptional end-to-end performance of Elevate. Customisable data centre solutions ready to meet the most complex challenges of a high-demand future.

## Future Faster

## Build faster, build for the future, build with Elevate

The race is on to build data centre, HPC and AI facilities at scale internationally, in the shortest time possible, without compromising on performance, quality, and support.

Welcome to Elevate – cabling, racks and more, designed for the future, delivered faster.

### Future-ready.

High performance and innovation designed into every solution, from component choice to system performance. Elevate enables you to build for what's to come with confidence. Whether that's ultra high-density optical fibre networks for 800G and beyond, or the highest quality rack and cable containment systems.

### Enhanced.

Our standard is higher. By choosing only premium grade materials, we guarantee that Elevate solutions are future-ready, with beyond industry standard performance built in, designed specifically for maximum reliability and uptime.

### Partner-powered.

We understand that successful deployments are achieved from more than just solution selection, that's why we partner with best-in-class, highly trained systems integrators, and also complement the Elevate offer with carefully selected technology partners in the fields of physical security, rack power, and liquid cooling.

### Flexible.

Off-the-shelf, or bespoke, our in-house design, off-site build services, and adaptable product designs, enable our team of experts to develop solutions tailored to meet your exact requirements.

### Fast.

Streamlining build programmes by slashing lead times through extensive stock availability and a highly responsive supply chain.

### From Excel Networking.

Elevate is part of the Excel family of passive cabling and rack solutions. Designed specifically for the data centre and enterprise markets, but built from the knowledge, expertise and passion behind one of EMEA's leading cabling brands.

# Elevate's got everything covered

With solid foundations and supreme flexibility, Elevate is the perfect fit for all aspects of your data centre install.

From the racking and containment through to the fibre connectivity, Elevate adapts effortlessly to every detail and challenge of your environment. We take these solutions, designed specifically for the data centre of tomorrow, and combine them with best-in-class technology partners to provide end-to-end cabling, rack, power, and cooling for both grey and white space installations.

And because we understand build time is of the essence, we provide these solutions quickly, wherever you are building, with local stock, UK fibre cable and rack assembly, and short production times.

Put simply, we bring the future faster.

## Experience Elevate first-hand

Cutting-edge innovation comes with personal service.

You can discover the incredible capabilities of Elevate first-hand by visiting our UK demonstration and production facilities.

Located at our Birmingham HQ, our fibre production team focuses on high density MPO cable assembly. You can also view the rack assembly operation offering both standard and customisable specifications in volume at speed. Here, you'll have the chance to speak with our experts about the advantages of our future-ready technology and the various support services available to assist your project planning and deployment.

Our M-Tech demonstration facilities are located in the City of London and Birmingham, showcase all of our solutions, from fibre optic cabling and connectivity and yellow duct containment, hot and cold aisle containment, racks, intelligent in-rack power and liquid cooling.

Be inspired with network-ready demonstrations as we develop the perfect solution for you.

# Connecting a changing world

In a future of rapid change, enterprise and data centre builds across the globe are choosing our products to be ready for tomorrow.

We are owned by Sonepar, the world's largest B2B electrical solutions distributor. With private ownership, operations in over 40 countries, and annual revenues exceeding 30 billion euros, we benefit from a unique scale, reach, and stability.

Global presence, with a local touch.

# Powered by partnerships

To give you the best solutions, we collaborate with the brightest partners.

We work closely with carefully chosen technology partners whose power, cooling, and software solutions complement the passive Elevate offer. This ecosystem together with our international distribution, and expert integration partners, enable end-to-end design and build programmes to be completed to the highest standards with minimal fuss.

# Complete solutions, total support

Advanced design, a highly responsive supply chain, powerful new partnerships, unrivalled customer service – Elevate gives you scalable solutions that are ready for the future, now.

## High-performance expertise

Elevate is delivered by Excel Networking, a leader across EMEA in the supply of passive solutions for the LAN environment. Elevate takes this heritage and experience to a new level with brand new solutions designed to meet not just the performance, but also the demanding lead times of todays data centre market.

## Unrivalled support

To help you work effortlessly and meet new challenges, we provide unparalleled customer support at every level. Our team of pre-sales, and account managers are on hand to support design, solution selection, and commercial proposals, right through to delivery and post sales support programmes such as warranties and maintenance.

## Fast solutions, lasting reassurance

Elevate is designed to give you results without the wait – thanks to our huge stock availability, short lead times and pre-terminated services. What's more, this comes with the long-term peace of mind of our lifetime warranty. So you're ready for whatever the future brings.

## Sustainability built-in

Being future-ready means being serious about sustainability. We are committed to doing what's right for the environment – from minimising plastic packaging, offsite pre-configuration that reduces waste, zero waste to landfill production facilities – we are making significant steps towards net zero by 2030.

The future is fast, be ready with the exceptional end-to-end performance of Elevate. Customisable solutions ready to meet the most complex challenges of a high-demand future.
