

# Elevate Aisle Containment

## Hot Aisle Fixed Side Panel Sets

### Product Overview

The Elevate Hot Aisle Containment System manages data centre airflow by channelling server exhaust heat directly into the ceiling plenum or CRAC/CRAH return, isolating hot and cold air streams to reduce thermal inefficiencies and improve cooling performance by up to 30%.

The Elevate Hot Aisle Side Panel Sets are modular components designed to form part of the Elevate Hot Aisle Containment System. Constructed from high-quality extruded anodised aluminium and 8 mm clear polycarbonate, these panels mount directly onto Elevate DCR Racks to create a secure and efficient containment structure. Available in heights of 1 metre or 2 metres and widths ranging from 600 mm to 1600 mm, they offer flexible installation options for single or double rack spans. Each panel includes integrated LED lighting for aisle illumination and features an extended brush seal to minimise airflow loss at the ceiling interface.
