Elevate Base12 SM OS2 and MM OM4 MPO Trunk

Product Overview

The Elevate range of MPO to MPO trunk cable assemblies form part of the wider MPO cassette and patching solution. As standard each cable is assembled using Senko low loss MPO Plus connectors and B2ca Euroclass multifibre cable which for singlemode is A2 specification and for multimode bend insensitive.

Elevate trunk cables are unpinned female to female as standard and wired to polarity B, in multi sub unit cables the standard breakout cable length from the connector side of the manifold to the connector face is 600mm. Male connectivity and alternative wiring and breakout lengths are available please request these when specifying your enquiry.

Cables detailed within this data sheet are OM4 multimode, and OS2 singlemode, other fibres including OM5 are available on request.

- √ Senko low loss MPO Plus
- V Sustainable packaging solutions including returnable reels
- ✓ Available as 12f though to 144f assemblies
- √ B2ca Euroclass cable as standard
- Compatible with the Elevate HD and MD cassette solution

Product Features Explained

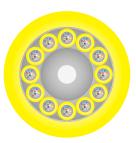

All Elevate MPO solutions are built on Senko low loss, best in class connectivity.

Each MPO Cable is factory tested. Test data is accessed via the QR code attached to the cable which links to our test trace portal.

Cable cross section

Produced using 12f sub units in a compact diameter design.

Fibre configuration

Terminated with Senko MPO Plus low loss 12F connectors, female (unpinned) as standard male (pinned) available on request.

Polarity

Assembled to Polarity B as standard. Alternative polarity available on request.
